CAREER OBJECTIVE

Computer Science undergraduate interested in data analytics and business intelligence. Experienced with SQL, Python, Excel and Tableau through academic and personal projects. Seeking an internship where I can apply data cleaning, visualization and analytical problem-solving skills.

EDUCATION

Bachelor of Computer Science - Malaysian University | 2023-2027

CGPA: 3.41/4.00 | Coursework: Data Analytics, Database Systems, Statistics, Machine Learning

TECHNICAL SKILLS

Data: Python, Pandas, SQL, Excel, Tableau, Power BI

Development: HTML, CSS, JavaScript, Git, MySQL

Knowledge: Data cleaning, exploratory data analysis, dashboard design, basic machine learning

PROJECTS

Graduate Employment Dashboard | Python, Pandas, Tableau

Cleaned and analyzed a dataset of more than 5,000 graduate records. Created visualizations comparing employment outcomes by field of study, location and skill category, then presented findings through an interactive Tableau dashboard.

Retail Sales Analysis | SQL, Excel

Wrote SQL queries to summarize monthly revenue, top-selling products and customer purchasing patterns. Built an Excel dashboard with pivot tables and charts for management-style reporting.

Movie Recommendation Prototype | Python

Implemented a basic content-based recommendation approach using movie genres and similarity scores. Evaluated recommendations with several sample user profiles.

EXPERIENCE

Part-Time Administrative Assistant | Dec 2025-Feb 2026

Maintained spreadsheet records, checked data accuracy and prepared weekly summaries. Improved consistency of records by standardizing commonly entered values.
