PROFESSIONAL SUMMARY

Final-year Software Engineering student with hands-on experience building web applications, REST APIs, databases, and data-driven features. Comfortable with Python, React, Laravel, MySQL, Git, and software testing. Seeking a software engineering or data-focused internship where I can contribute to real product development.

EDUCATION

Bachelor of Computer Science (Software Engineering) with Honours - Malaysian Public University | 2023-2027
CGPA: 3.52/4.00 | Relevant coursework: Software Engineering, Database Systems, Data Analytics, AI, Software Testing

TECHNICAL SKILLS

Languages: Python, JavaScript, PHP, Java, SQL

Frameworks/Tools: React, FastAPI, Laravel, Git, GitHub, Postman, MySQL, Firebase

Other: REST APIs, Agile, unit testing, requirements analysis, data visualization

PROJECTS

Career Readiness Analysis Platform | React, FastAPI, MySQL

Built a web platform that evaluates resumes, compares candidate skills with job requirements, and generates improvement recommendations. Designed REST endpoints and relational database tables; implemented validation and scoring logic for resume and skill analysis.

Personal Finance Tracker | Laravel, MySQL

Developed authentication, transaction tracking, category-based spending summaries, and monthly budget views. Added input validation and dashboard reporting to help users identify spending patterns.

IoT Transit Monitoring Dashboard | Node-RED, MQTT, InfluxDB

Integrated multiple sensor streams through MQTT and displayed near-real-time readings on a monitoring dashboard. Stored time-series data and configured alerts for abnormal readings.

EXPERIENCE

Software Development Intern - Nexa Digital Solutions | Jun 2026-Aug 2026

Assisted with bug fixes and API testing for an internal web system. Documented defects, tested endpoints using Postman, and collaborated with developers through Git-based code reviews.
